

Linus Murphy

Architect, AAA, SAA, OAA, MRAIC, LEED® AP
Principal

Linus believes that great work takes a passion for design and teamwork. We see the results of his passion and his leadership across 30 years of experience in a variety of sectors and building types including emergency services, commercial, residential and recreational buildings. Design excellence and superior client service are at the core of Linus' values, informing his collaborative and inclusive approach. Linus measures his success by how well the buildings he designs support the vision and mission of his clients and by how they perform in the long term — operationally, functionally and environmentally. Linus believes that buildings are enduring architectural legacies that enhance our everyday experiences, inspire and support creativity and function at every level.
